DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by either Yamamoto et al or Whitley. Regarding claim 8, one of the walls of Yamamoto et al which contains one of holes 12 and 14 is read as the recited "wall". Regarding claim 8, vertical partition 78 of Whitley is read as the recited "wall". Notches 134 of Whitley are read as at least a portion of the "return line".

3. Claims 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al.

4. Claims 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Whitley.

5. Claims 1-2, 4, 8, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by any one of Ganachaud et al, King et al, Shimamura et al, or Ehrman et al.

Regarding claim 8, wall 9 of Ganachaud et al is read as the recited "wall". In Ganachaud et al, port 13 is read as at least a portion of the "return line". Regarding claim 8, diversion baffle 70 of King et al is read as the recited "wall". Regarding claim 8, one of partition walls 53 and 54 of Figure 7 of Shimamura et al is read as the recited

Art Unit: 3753

"wall". Regarding claim 8, barrier wall 52 of Ehrman et al is read as the recited "wall".

In Ehrman et al, the port controlled by discharge valve 60 is read as a "return line".

Even though the filing dates of Shimamura et al and Ehrman et al are after the filing date of the foreign priority papers, applicants cannot rely upon the foreign priority papers to overcome the rejections based upon Shimamura et al and Ehrman et al because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

6. Claims 5-7 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by either King et al or Ehrman et al.

7. Claim 12 is rejected under 35 U.S.C. 102(e) as being anticipated by any one of Ganachaud et al, King et al, or Shimamura et al.

8. Claims 1-12 are further rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation of "at least one aeration line" and "at least one de-aeration line" in claim 1, lines 3-4 and "a return line" in claim 1, line 12 is inaccurate. In the embodiments disclosed, the "aeration" line, "de-aeration" line, and "return" line are all the same line. To recite these lines in claim 1 (and in the dependent claims) as three different lines is inaccurate and confusing.
